

MUHAMMAD HAMZA NASEEB

Full-Stack Developer • MERN Stack • Node.js • React

muhammadhamza662c@gmail.com | +92 345-4111932 | Firdos Market, Gullberg Lahore, Pakistan | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full-Stack Developer specializing in the MERN Stack (MongoDB, Express.js, React.js, Node.js) with proven experience across freelance, internship, and on-site software development roles. Skilled in building, deploying, and maintaining production-grade web applications using JavaScript, TypeScript, React.js, Node.js, and Express.js, with hands-on experience in REST API design, JWT authentication, Stripe payment integration, and AI/LLM API integration (Gemini AI). Strong track record of delivering clean, modular, scalable code and collaborating effectively with cross-functional teams and international clients. Seeking a Full-Stack / MERN Stack Developer role to contribute technical expertise and deliver measurable business impact.

CORE SKILLS

JavaScript (ES6+) | React.js | Node.js | Express.js | MongoDB | REST API Development | JWT Authentication | Stripe API | Git & GitHub | MERN Stack | Full-Stack Development | Agile Methodology | Responsive Web Design | Deployment (Vercel, Render, Netlify)

TECHNICAL SKILLS

Languages JavaScript (ES6+), C++

Frontend React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design (Vue.js / Angular: familiar)

Backend Node.js, Express.js, REST API Development, JWT Authentication, Nodemailer

Database MongoDB, Mongoose, MongoDB Atlas, MySQL

Dev Tools Git, GitHub, Postman, VS Code

Integrations Stripe API, Gemini AI API, Google Maps API

Methods & Deployment Agile, Code Reviews, Vercel, Render, Netlify

WORK EXPERIENCE

Full-Stack Developer (On-Site) | WebHivez

Jun 2026 – Present

- Develop and maintain production MERN stack applications on-site, writing clean, scalable, well-documented code.
- Collaborate directly with the development team on feature delivery, code reviews, testing, and deployment.
- Contribute across the full development lifecycle from requirements gathering to production deployment in a fast-paced, in-office environment.

Artificial Intelligence Engineer (Internship, Remote) | Decode Lab

Jun 2026 – Jul 2026

- Completed a remote internship applying AI/ML engineering practices to real project workflows.
- Collaborated with a distributed team on AI-driven features, model integration, and problem-solving tasks.
- Earned a Certificate of Completion recognizing successful delivery of internship objectives.

Full-Stack Developer (Internship, Remote) | CodeAlpha, International

Jun 2026 – Jul 2026

- Built MERN stack applications supporting core company workflows.
- Partnered with stakeholders to gather requirements and deliver custom software solutions on schedule.
- Completed the internship with a Certificate of Completion and a Letter of Recommendation for consistent performance.

PROJECTS

CheckInns — Smart Lodge & Hotel Booking Platform (Final Year Project)

May 2024 – Apr 2026

Live Demo: <https://checkinns-smart-lodge.onrender.com/>

Tech Stack: MongoDB, Express.js, React.js, Node.js, TypeScript, Stripe, JWT, Gemini AI, Nodemailer

- Built a full-stack hotel, restaurant, and lounge discovery and booking platform, similar to Booking.com, for the Pakistani market.
- Implemented multi-role authentication (guest, owner, admin) using JWT with secure session management.
- Integrated Stripe for real-time payment processing and Nodemailer for automated transactional email notifications.
- Integrated Gemini AI for smart property recommendations, demonstrating applied experience with LLM APIs in production.
- Deployed backend on Render (Node.js/Express) and frontend on Vercel (React), resolving production CI/CD issues.
- Wrote modular, testable code with clean separation of concerns across controllers, services, and middleware.

SoulMatch — AI-Powered Matchmaking App

Apr 2026

Tech Stack: MongoDB, Express.js, React.js, Node.js, Gemini AI, JWT

- Developed a full-stack AI matchmaking application integrating Gemini AI for personality-based compatibility scoring.
- Built secure user profiles with preference-based filtering and real-time match notifications.
- Independently architected and shipped a complete MERN application end-to-end within a short timeframe.

TasteHub — Restaurant & Fast Food Ordering Website

2026

Live Demo: <https://taste-hub-project.netlify.app/>

Tech Stack: HTML5, CSS3, JavaScript

- Built and deployed a responsive restaurant and fast food ordering website using vanilla HTML, CSS, and JavaScript.
- Designed a clean, mobile-friendly menu browsing and ordering interface focused on usability and fast load times.
- Deployed and hosted the live site on Netlify, demonstrating front-end development and deployment skills independent of a framework.

Life Savers — Charity Management Platform

Sep 2023 – Feb 2026

Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT

- Built a full-stack charity donation and volunteer management platform.
- Implemented donor dashboards, campaign tracking, and automated donation receipts.
- Developed an admin panel for managing campaigns, volunteers, and financial reporting.

EDUCATION

BS Software Engineering | COMSATS University Islamabad, Vehari Campus

2022 – 2026

Relevant coursework: Data Structures & Algorithms, Database Systems, Software Engineering, Web Development, Machine Learning, Human-Computer Interaction

CERTIFICATIONS & ACHIEVEMENTS

- FYP Selected for External Viva — Smart Lodge Management System (CheckInns), COMSATS 2026
- Certificate of Completion & Letter of Recommendation — Full-Stack Developer Internship, CodeAlpha (Jun–Jul 2026)
- Certificate of Completion — Artificial Intelligence Engineer Internship, Decode Lab (Jun–Jul 2026)
